

## **EQUIPMENT SUPPORT FOR USE WITH OFFICE CUBICLES**

### **ABSTRACT OF THE DISCLOSURE**

The present invention provides a variety of devices suitable for mounting objects, including heavy objects, on a wall of a cubicle or similar structure. Some such devices are configured to support a flat-panel monitor for a computer, a television or a similar device. Some embodiments include a bracket which supports the device from the top of a cubicle wall. Some devices include a track with a plurality of sections, at least one of which is configured to slide within another section.
